CASH RECEIPTS FROM FARMING IN OHIO

1975

Ohio cash receipts from farm marketings of crops, livestock, and livestock products was \$2,614,159,000 ^{1/} in 1975 -- up 3 percent from a year earlier and the highest of record since estimates were first prepared in 1924. At \$1,488,194,000, the 1975 sale of crops declined 5 percent from 1974 and accounted for 56.9 percent of the total cash receipts from farm marketings compared with 61.9 percent in 1974. Cash receipts from livestock and livestock products at \$1,125,965,000 were up 16 percent from a year earlier and accounted for 43.1 percent of the total compared to 38.1 percent in 1974. Government payments amounted to an additional \$8,822,000.

Corn cash receipts at \$491,183,000 for 1975 ranked number one as the largest single source of income for the first time since the state started the cash receipts program. Soybeans at \$434,016,000 decreased 27 percent from the previous year and ranked second as an income source. Wheat cash receipts rose 12 percent in 1975 following a record high production. Most other crops showed increases in revenues from the previous year, with vegetables and all hay leading the way in percent increases with 14 percent and 37 percent, respectively. Slight decreases in cash receipts were noted in potatoes, down 7 percent; and sugar beets, down 8 percent.

In the major livestock groups, cash receipts from dairy products increased 4 percent from the previous year to \$371,569,000 and retained its ranking as the third most important commodity.

Hogs at \$307,050,000 and cattle and calves at \$308,532,000 increased 22 percent and 38 percent, respectively. Higher prices pushed up the hog cash receipts while a 48 percent increase in the number of cattle and calves sold accounted for that group's jump. Hogs dropped one position to 5th even though prices remained favorable. Poultry and eggs had cash receipts of \$116,225,000 -- a 6 percent increase in revenue -- and remained in 7th position.

In 1975, Darke County again led the state in total cash receipts with \$94 million compared to \$88 million in 1974. The next four highest counties were Mercer, Wayne, Wood and Putnam. Each exceeded \$68 million in cash revenue.

Leading counties by commodities were: soybeans, Darke; corn, Darke; dairy products, Wayne; hogs, Clinton; cattle and calves, Clark; wheat, Wood; poultry and eggs, Mercer; greenhouse and nursery, Lake; and vegetables, Sandusky.

^{1/} The 1975 cash receipts for soybeans are incorrect as published in the Supplement to Statistical Bulletin No. 557, August 1976, State Farm Income Statistics. The correct 1975 soybean total is \$434,016,000 and 1974 is \$590,692,000. The correct 1975 Ohio cash receipts total is \$2,614,159,000.

PROCEDURE

Ohio estimates of cash receipts by county from farm marketings were published initially in 1927 and annually since 1929. These county estimates of cash receipts are published by the Department of Agricultural Economics and Rural Sociology of the Ohio State University and the Ohio Agricultural Research and Development Center in cooperation with the Statistical Reporting Service of the U. S. Department of Agriculture. This bulletin contains 1975 Ohio county cash receipts estimates and revised 1974 state estimates. County production estimates of various commodities are published annually in the Ohio Agricultural Statistics bulletin.

Current cash receipts estimates for Ohio and other States appear in the USDA's State Farm Income Statistics 1949-1975, Supplement, August 1976. These estimates are prepared by the Economic Research Service of the U. S. Department of Agriculture from basic data provided by the Statistical Reporting Service, the Census of Agriculture, and other sources. Estimates presented in this publication may differ from previously published data due to revisions in marketings, inshipments, inventory numbers, and other data, as more complete information becomes available. Cash receipts for some commodities were combined to avoid disclosure of individual operations.

Cash receipts from farm marketings of farm products represents calendar year gross receipts from commercial market sales as well as loans (net of redemptions) made or guaranteed by CCC and purchases under price support programs. The value of home consumption and production expenses are excluded. County estimates of cash receipts from marketings are derived by allocating state estimates to counties on the basis of crop reporting and census marketings by crop reporting districts. Check data such as county dairy production from the milk market administrators are also used.

A farm is a place of less than 10 acres if the sales of agricultural products for the year amounted to at least \$250 or normally would be expected to amount to that value or more. Places of 10 acres or more were counted as farms if the sales of agricultural products amounted to at least \$50 or normally would be expected to amount to that value or more. The average cash receipts per farm will aid in the comparison of counties with similar farming practices better than a comparison of total cash receipts.

This bulletin has been prepared through the efforts of many people. Included are personnel of agricultural agencies throughout Ohio. The greatest recognition is due the large number of Ohio farmers and agri-businessmen for their interest and help in providing the basic data used in compiling this information.

TABLE I

CASH RECEIPTS FROM FARM MARKETINGS AND GOVERNMENT PAYMENTS, OHIO, 1945-1975

Year	Farm Marketings				Percent of All Commodities		
	Livestock and Livestock Products	Crops	Total Livestock and Crops	Government Payments	Total Cash Receipts and Government Payments	Livestock and Livestock Products	Crops
